## Steel liners

welding casings are built as spiral in round (C85) or flat (C72) phosphatized steel wire zinc-plated steel, or high tensile zinc-plated steel. External coating can be performed with PE-LD or PVC.

Steel liners can be built under specific client request

## STEEL LINERS

|  |                             |
|--|-----------------------------|
| Round wire blue casing                     | ø inner 1,5 mm outer 4,5 mm |
| Round wire red casing                      | ø inner 2,0 mm outer 4,5 mm |
| Flat wire yellow casing                    | ø inner 2,4 mm outer 4,5 mm |
| Standard lengths                           | 3,4 m 4,40 m 5,40 m         |
| Standard lengths for steel liners in rolls | 50 m                        |
